

# EXCLUSIVE LIMITED EDITION

## LAUREL VALLEY 65' MILL GONDOLA IN N SCALE

From *Eastern Seaboard Models Corporation*  
*N Scale reproductions of eastern railroad prototypes*

Offered as an extremely limited edition. ESM will produce only the quantity reserved in this run, and this car will not be offered again.

The Laurel Valley Railway is Lee Weldon's free-lance N scale line, showcased in the September/October edition of *N Scale Magazine*. The LRV served mines and industries along the Laurel Highlands, from Latrobe to Somerset, Pennsylvania, and as a bridge route between the PRR at Latrobe, and the Western Maryland at Rockwood Junction. Latrobe Specialty Steel was a major shipper on the line, utilizing dozens of these 65' cars to bring scrap alloys in for processing, and to ship out finished specialty steel products for a variety of industries. Originally built in 1933, and acquired from the Pennsylvania Railroad in April of 1964, these G-26 class gondolas would be seen in interchange service all over the northeast.

This outstanding model includes: Modeler applied road numbers (decals provided), Detailed reporting marks and dimensional data, Micro Trains body mounted couplers and Barber roller bearing trucks, and exquisite detail, inside and out.
